

PEDRO JAVIER GUTIERREZ ARMAS

Principal SQL Database Administrator | Production Support and Performance Engineering

San Jose, Costa Rica | +506 6351-5860 | pj13eros@hotmail.com | linkedin.com/in/pedrogutierrez13

PROFESSIONAL SUMMARY

Principal-level SQL Server DBA, database engineer, and SQL developer with 15+ years of experience administering, securing, developing, optimizing, and supporting enterprise databases and data platforms. Current hands-on experience supporting SQL Server on AWS RDS across production and non-production environments, with strong expertise in advanced T-SQL, indexing, execution analysis, backup and restore, SQL Agent monitoring, database security, production incident response, and controlled deployments. Proven record of improving query execution time by up to 50%, establishing database access and operating standards, leading data recovery and migration work, documenting repeatable procedures, and partnering with developers and stakeholders to resolve complex database issues.

TECHNICAL SKILLS

Area	Tools and practices
SQL Server operations	AWS RDS, production, development and staging environments, SSMS, DBeaver, SQL Agent, Database Mail, maintenance, backup and restore, monitoring and incident support
Performance engineering	Advanced T-SQL, stored procedures, functions, indexing, execution-pattern analysis, long-running queries, set-based optimization and bottleneck troubleshooting
Security and standards	RBAC, least privilege, JIT privileged access, login and user auditing, schema permissions, SID mapping, credential rotation, runbooks and operational procedures
Platforms and integration	SQL Server, AWS RDS, SSIS, MySQL, PostgreSQL, Snowflake, Azure-based environments, ETL/ELT, data warehousing and Power BI
Automation and delivery	PowerShell, Python, Git, controlled deployment and rollback scripts, diagnostic utilities, Agile collaboration, Cursor and AI-assisted pull-request review

PROFESSIONAL EXPERIENCE

SQL Server DBA / Database Engineer | MWR Life

September 2024 - Present | Remote / Costa Rica

- Administer and support SQL Server databases hosted on AWS RDS across Production, Development, and Staging, covering access, connectivity, backup and restore, maintenance, monitoring, and production incident response.
- Designed a role-based access model using least-privilege principles, standardized account conventions, JIT privileged access, permission audits, and controlled post-restore procedures for lower environments.
- Develop T-SQL stored procedures, functions, deployment and rollback scripts, diagnostic procedures, and support utilities while resolving authentication, SID mapping, SSL, firewall, and application connectivity issues.
- Led a controlled production data recovery and integration remediation effort, validating source backups, recovering hundreds of records, correcting stored procedures, and completing post-deployment verification.
- Analyze long-running queries, indexes, execution patterns, query variants, and cursor-based processes; design set-based alternatives and validate output equivalence before release.
- Built monitoring dashboards and runbooks for SQL Agent jobs, alerts, execution history, integrations, data-quality exceptions, restore procedures, access controls, and incident response.

Technologies: SQL Server, AWS RDS, T-SQL, SSMS, DBeaver, SQL Agent, Database Mail, PowerShell, JSON/OpenJSON, Git, RBAC, JIT access, backup/restore, monitoring and performance tuning

DBA / SQL Developer | Health Catalyst

May 2021 - September 2024 | San Jose, Costa Rica

- Developed and supported SQL Server, SSIS, Snowflake, Python, and PowerShell data workflows for production and client-facing requirements.
- Designed customized ETL applications that reduced manual processing time by up to 40%.
- Automated validation and anomaly-detection routines, improving data-validation accuracy by 30% and supporting reliable reporting operations.

Technologies: SQL Server, T-SQL, SSIS, Snowflake, Python, PowerShell, Power BI, Pandas and Excel

SQL Developer | Intertec International

February 2019 - April 2021 | San Jose, Costa Rica

- Developed and optimized advanced T-SQL queries, stored procedures, and database workflows supporting production business logic and analytics.
- Reduced query execution times by up to 50% through SQL tuning, indexing strategies, and performance analysis.
- Integrated SQL Server, Salesforce, and MySQL data while improving data accuracy by more than 25% through validation and error handling.

Technologies: SQL Server, T-SQL, SSIS, Salesforce and MySQL

DBA / SQL Developer | EL Tiempo

September 2020 - November 2020 | Colombia

- Led planning and execution of migration activities for ten SQL Server databases, delivering all phases on time and within scope.
- Coordinated migration risk analysis, data validation, integrity controls, deployment timing, and operational continuity with cross-functional teams.

Technologies: SQL Server, SSIS, Azure and SSRS

DBA / SQL and BI Consultant | Gold Data Networks

January 2016 - February 2020 | Panama City, Panama

- Designed relational databases, schemas, tables, stored procedures, and supporting objects for operational applications and reporting workloads.
- Delivered database, integration, and BI solutions aligned with application performance and infrastructure requirements.

Technologies: SQL Server, SSIS, SSRS, PostgreSQL, Power BI and Excel

Data Warehouse DBA | BAC Credomatic

November 2017 - January 2019 | San Jose, Costa Rica

- Developed and maintained ETL pipelines that loaded multiple source systems into the enterprise data warehouse.
- Designed and optimized tables, indexes, and views for reliable, high-performance analytical workloads.

Technologies: SQL Server, SSIS, SSAS, SSRS, Power BI and Azure

ADDITIONAL DATABASE EXPERIENCE

- Bosal, DBA and BI Consultant: designed the first stage of the main data warehouse, produced management reporting, and shared database improvement practices with development teams.
- Xetux Solutions, Database Manager: defined database-management policies and improved performance and data security across business areas.
- ACH Cloud Services, SQL and BI Consultant: administered and developed databases, created operational reporting, and documented the data environment.
- EducaTablet and VIGEOSOFT, Microsoft SQL Server DBA: administered production databases, improved database process response times, modeled OLTP systems, and trained development teams.
- Optica Caroni, Developer Analyst: delivered production workflow, database, and reporting projects using SQL Server, SSIS, SSRS, .NET, and VB6.

EDUCATION AND LANGUAGES

Systems Analyst, Informatics - IUT Dr. Federico Rivero Palacio (2000 - 2004)

Training: SQL Admin Part 1; Analyzing and Visualizing Data with Power BI; Dataiku Core Designer; Python for Data Analysis

Spanish: Native | English: Full Professional
