

PEDRO JAVIER GUTIERREZ ARMAS

Data Engineer | Python, Snowflake, SQL, ETL/ELT, dbt & Data Quality

San Jose, Costa Rica | +506 6351-5860 | pj13eros@hotmail.com | linkedin.com/in/pedrogutierrez13

PROFESSIONAL SUMMARY

Data Engineer, Snowflake Developer, and SQL Server specialist with 15+ years of experience designing, building, optimizing, and maintaining ETL/ELT pipelines, data ingestion and transformation workflows, data warehouse solutions, reporting datasets, and analytics-ready models. Strong hands-on experience with Python, Pandas, NumPy, Matplotlib, Snowflake SQL, dbt, SQL Server, SSIS, PowerShell, Power BI, Azure-based environments, PostgreSQL, MySQL, validation checks, error handling, anomaly detection, performance optimization, and stakeholder collaboration. Experienced improving data quality, warehouse processing efficiency, and reporting reliability in remote, cross-functional environments.

TECHNICAL SKILLS

Python & Automation: Python, Pandas, NumPy, Matplotlib, PowerShell, automated validation, exploratory data analysis, data processing workflows.

Snowflake & Modern Data Stack: Snowflake SQL, dbt models, silver and gold layers, MetricFlow support, warehouse performance optimization, Kimball practices.

SQL & Performance: SQL Server, T-SQL, stored procedures, complex queries, indexing, query optimization, PostgreSQL, MySQL.

ETL/ELT & Data Platforms: ETL/ELT pipelines, SSIS, data ingestion, transformation, data warehousing, data modeling, reporting datasets, Azure-based environments.

Data Quality & Collaboration: Validation checks, error handling, anomaly detection, data dictionaries, process documentation, stakeholder collaboration, requirements translation.

PROFESSIONAL EXPERIENCE

ServiceTitan - Snowflake Developer / Data Engineer | Sep 2024 - Present | Remote / Costa Rica

- Migrated reporting and business logic from C# processes into Snowflake SQL to support scalable reporting and analytics workflows.
- Create and maintain dbt models across silver and gold data layers, improving model organization, reusability, and downstream reporting reliability.
- Optimize Snowflake SQL and dbt workloads, reducing warehouse processing time by approximately 20% in an initial optimization phase.
- Created a Kimball-based data warehouse proof of concept to define modeling standards and improve query and processing performance.
- Support MetricFlow work by helping organize analytical metrics across datasets for more consistent reporting definitions.

SMASH Costa Rica - Data Engineer | May 2021 - Sep 2024

- Designed and implemented customized ETL applications and data workflows using SQL Server, SSIS, Python, PowerShell, Snowflake, Power BI, and Excel.
- Reduced manual processing time by up to 40% through tailored ETL automation and repeatable data processing workflows.
- Developed automated exploratory data analysis and validation tools with Pandas, NumPy, and Matplotlib to detect anomalies and improve validation accuracy by 30%.
- Prepared, cleaned, transformed, and modeled datasets for business reporting, Power BI dashboards, and operational decision-making.

Intertec International - SQL Developer | Feb 2019 - Apr 2021

- Developed and optimized stored procedures, SQL queries, and database workflows supporting complex business logic and analytics needs.
- Consolidated multiple disparate data sources into analytics-ready datasets using optimized ETL processes.
- Improved data accuracy by more than 25% through validation checks and error-handling mechanisms across key workflows.
- Reduced query execution times by up to 50% through SQL optimization, indexing strategies, and performance tuning.

EL Tiempo - DBA / SQL Developer | Sep 2020 - Nov 2020

- Supported data migration projects for 10 databases, coordinating risk identification, validation, data integrity, and continuity activities.
- Worked with SQL Server, SSIS, Azure, and SSRS to support reliable data movement and reporting availability during deployment activities.

Gold Data Networks - DBA / SQL & BI Consultant | Jan 2016 - Feb 2020

- Built relational databases, table structures, custom database objects, and stored procedures for scalable backend and reporting workloads.
- Designed and implemented end-to-end data solutions integrated with existing infrastructure and BI/reporting needs.
- Delivered SQL Server, SSIS, SSRS, PostgreSQL, Power BI, and Excel solutions for operational reporting and business analysis.

BAC Credomatic - Data Warehouse DBA | Nov 2017 - Jan 2019

- Developed and maintained ETL pipelines to extract, transform, and load data from multiple sources into the data warehouse.
- Defined and optimized table, index, and view structures for high-performance analytical workloads.
- Supported SSAS, Power BI, SSRS, and Azure-based reporting environments for large-scale analytics and decision support.

ADDITIONAL EXPERIENCE

Bosal, Xetux, ACH, EducaTablet, VIGEOSOFT, Optica Caroni - Database / BI / SQL Roles | *Earlier Experience*

- Designed data warehouse stages, centralized reporting datasets, dashboards, reports, and business control processes using SQL Server, SSIS, SSRS, Azure, MySQL, Power BI, .NET, and VB6.
- Defined database management policies, improved performance and data security, and documented data environments with data dictionary practices.
- Trained development teams on database programming practices and supported BI/reporting delivery for management and operational teams.

EDUCATION & CERTIFICATIONS

- Systems Analyst, Informatics - IUT Dr. Federico Rivero Palacio.
- Complete Data Science Training with Python for Data Analysis.
- Analyzing and Visualizing Data with Power BI.
- Dataiku Core Designer.
- SQL Admin Part 1.
- R Programming A-Z: R for Data Science.
- English Certificate.
