

PEDRO JAVIER GUTIERREZ ARMAS

Senior Data Engineer | SQL Server, SSIS, SSAS, T-SQL, Data Warehouse & Cloud Data Platforms

San Jose, Costa Rica | +506 6351-5860 | pj13eros@hotmail.com | linkedin.com/in/pedrogutierrez13

PROFESSIONAL SUMMARY

Senior Data Engineer, Snowflake Developer, and SQL Server specialist with 15+ years of experience designing, implementing, optimizing, and maintaining enterprise data solutions across on-premises and cloud environments. Strong background building ETL/ELT processes, data warehouses, reporting datasets, BI platforms, SQL Server solutions, SSIS packages, SSAS/SSRS assets, and analytics-ready models. Experienced translating business requirements into scalable data solutions, improving performance, migrating reporting logic into SQL, validating complex datasets, and supporting decision-making through reliable data products.

TECHNICAL SKILLS

Data Engineering & Warehousing: ETL/ELT, data pipelines, data transformation, data warehousing, data marts, dimensional modeling, Kimball POC, silver and gold layer models.

SQL Server Stack: SQL Server, T-SQL, stored procedures, complex queries, SSIS, SSAS, SSRS, indexing, query optimization, database objects, table and view structures.

Cloud & Modern Data Platforms: Snowflake, dbt, Azure-based environments, PostgreSQL, MySQL, Salesforce integrations, scalable analytics-ready datasets.

BI & Analytics: Power BI, SSAS, SSRS, Excel, reporting datasets, KPI dashboards, operational analytics, stakeholder-ready data models.

Automation, Quality & Documentation: Python, Pandas, NumPy, Matplotlib, PowerShell, validation checks, error handling, anomaly detection, data dictionaries, process documentation.

PROFESSIONAL EXPERIENCE

ServiceTitan - Snowflake Developer / Data Engineer | Sep 2024 - Present | Remote / Costa Rica

- Migrated reporting and business logic from C# processes into Snowflake SQL, improving maintainability and traceability of enterprise analytics workflows.
- Built dbt silver and gold layer models to deliver reusable, governed, analytics-ready datasets for reporting and decision-making.
- Optimized Snowflake SQL and dbt transformations, reducing warehouse processing time by approximately 20% while improving data workflow reliability.
- Contributed to a Kimball modeling proof of concept and MetricFlow exploration for standardized metrics and scalable semantic modeling.

SMASH Costa Rica - Data Engineer | May 2021 - Sep 2024

- Designed and maintained ETL workflows using SQL Server, SSIS, Python, PowerShell, Snowflake, Power BI, and Excel, reducing manual data processing by 40%.
- Prepared, cleaned, transformed, and modeled datasets for dashboards, reporting, operational analysis, and business decision support.
- Automated exploratory analysis, validation checks, and anomaly detection with Python, Pandas, NumPy, and Matplotlib, improving validation accuracy by 30%.
- Worked with business stakeholders to convert reporting requirements into structured datasets, repeatable transformations, and Power BI-ready outputs.

Intertec - SQL Developer | Feb 2019 - Apr 2021

- Optimized SQL Server stored procedures, complex T-SQL queries, and database workflows for reporting and operational data processes.
- Reduced query execution times by up to 50% through SQL optimization, indexing, and performance tuning.
- Consolidated data from SQL Server, SSIS, Salesforce, and MySQL sources into cleaner, more reliable reporting datasets.
- Improved data accuracy by more than 25% through validation rules, error handling, and repeatable database routines.

EL Tiempo - DBA / SQL Developer | Sep 2020 - Nov 2020

- Supported migration projects for 10 databases, coordinating validation, data integrity checks, risk reduction, and continuity activities.
- Worked with SQL Server, SSIS, Azure, and SSRS to help preserve reporting availability during multi-platform migration efforts.

Gold Data Networks - DBA / SQL & BI Consultant | Jan 2016 - Feb 2020

- Built relational databases, table structures, custom database objects, and stored procedures from scratch for scalable backend and reporting solutions.
- Delivered end-to-end data solutions integrating SQL Server, SSIS, SSRS, PostgreSQL, Power BI, Excel, and infrastructure-side requirements.
- Designed database logic and reporting structures to improve performance, standardize processing, and support enterprise analytics needs.

BAC Credomatic - Data Warehouse DBA | Nov 2017 - Jan 2019

- Built and maintained ETL pipelines from multiple source systems into a data warehouse environment using SQL Server and SSIS.
- Optimized table, index, and view structures for high-performance analytical workloads and BI consumption.
- Supported SSAS, Power BI, SSRS, and Azure-based reporting environments for large-scale analytics and decision support.

ADDITIONAL EXPERIENCE

Bosal, Xetux, ACH, EducaTablet, VIGEOSOFT, Optica Caroni - Database / Data Warehouse / BI Roles | *Earlier Experience*

- Administered and developed databases, data warehouse processes, reports, dashboards, and production workflows using SQL Server, SSIS, SSRS, .NET, VB6, and related Microsoft technologies.
- Created database policies, supported performance and security initiatives, documented data dictionaries, and improved database response times.
- Delivered reporting and operational data solutions for billing, sales, management, and business control processes.

EDUCATION & CERTIFICATIONS

- Systems Analyst.
- SQL Server Administration, Part 1.
- Microsoft Power BI.
- Data Science with Python.
- R Programming.
- Dataiku Core Designer.
- English Certificate.
